

Vessel Capsule – Summary for Customers

Materials & Design

Exterior: The exterior of the Vessel Capsule unit is made with high grade fluorocarbon sprayed aluminum panels. The frame is galvanized steel, and the entire structure is insulated and waterproofed. All glass windows are insulated hollow low-e glass, helping to maintain and regulate indoor temperatures.

Interior: Designed with a team of architects, the Vessel Capsule features a simplistic, future-proof, and neutral interior. High-quality, durable materials are used throughout, allowing you to personalize the space according to your design wishes and create a warm, welcoming experience.

Bedroom & Bathroom

All living spaces in Vessel Capsule models have floor-to-ceiling windows for immersive views. Spaces are equipped with blackout curtains, heating, AC, smart lighting, and more. Bathrooms use future-proof, durable materials such as marble, chrome, aluminum ceilings, and ceramic tiles. Features include a fully functioning shower, chrome hardware, washbasin with storage, marble countertop and shower floor, towel rack, toilet, toilet paper holder, and LED-lit mirror. Bathroom layouts depend on the Vessel Capsule model.

Model Example but there are more types see our brochure download: Vessel Capsule E3
